

Why carpooling is good for you?

For the employee:

- You can share the fuel cost with others
- It is not always your car wearing out
- You can build connections and community
- You protect the environment more than if you travelled alone

For the employer:

- Less car parking places needed, less investment
- Smaller company car fleet needed
- Rationalised fuel costs
- Well-cooperating community at the workplace

For the city:

- Less traffic, less congestion
- Better air quality, quieter streets
- Less parking places needed, more space for community use

What is the Greenformers to Work (Gr2W) application?

<http://sasmob-szeged.eu>

How does it work?

Gr2W is an application developed within the framework of the SASMOB project, able to help organising carpooling within a

company, among others. Using the application, you can offer a ride or book a ride offered by a colleague.

Sign up¹ on the webpage, then download the application from Google Play Store or Apple Store!

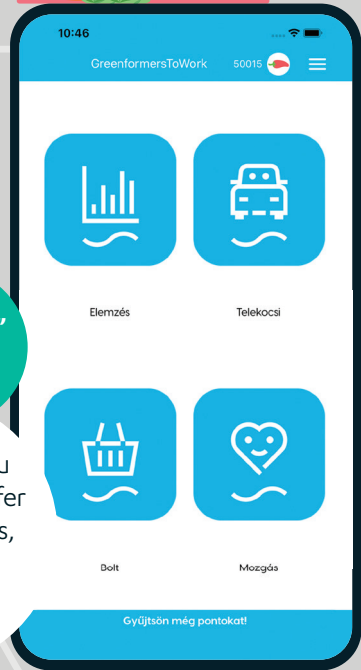

Use the functions most useful for you!

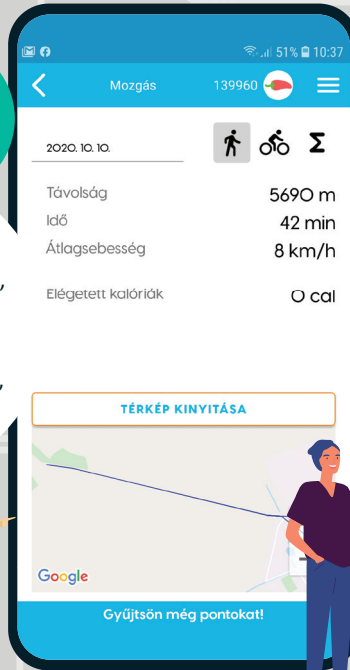

„Carpool” menu

- In the „Carpool” menu you can easily offer any of your rides, or book a ride offered by a colleague.

„Move” menu

- In the „Move” menu you can see the distance, the average speed and the burnt calories of your bike, car or walking trips.

„Statistics” menu

- In the „Statistics” menu you can follow how much you cycled, walked, used public transport, carpoled, or drove alone. You can compare your statistics to the company totals.

¹ Before signing up on the webpage, the employees have to be registered by the mobility manager of their employer.
